```
' as np
 colab.patches import cv2_imshow # Import cv2_imshow

.mage
: '/Screenshot 2026-08-09 202635.png'
ıread(image_path)

ıne:
'Error: Could not load image from {image_path}. Please check the path and f

: the image to 500x500 to match the original example's dimensions
:nsures the homography points remain relevant
'2.resize(img, (500, 500))

·iginal drawing operations were on a blank canvas,
: can still draw on the loaded image if desired.
ıw, let's just apply the homography directly to the image.

:ircles at the corners for visualization of source points (optional)
.rcle(img, (100, 100), 8, (0, 0, 255), -1)
.rcle(img, (400, 100), 8, (0, 255, 0), -1)
.rcle(img, (100, 400), 8, (255, 0, 0), -1)
.rcle(img, (400, 400), 8, (0, 255, 255), -1)

: points
 = np.float32([
), 100],
), 100],
), 400],
), 400]

ıation points
 = np.float32([
 50],
), 100],
), 450],
), 400]

:e Homography Matrix
ıs = cv2.findHomography(src_pts, dst_pts)

 Homography
: cv2.warpPerspective(img, H, (500, 500))

ıy using cv2_imshow
ıow(img)
ıow(output)

:y(0) and cv2.destroyAllWindows() are not needed with cv2_imshow in Colab
```
